## SMILE

### The advanced portable radio transmitter

SMILE is an innovative portable alarm trigger intended for use in homes to provide a feeling of security with the possibility to send alarms in the event of an emergency.

It can be worn on either the wrist or the neck. Of course, SMILE is easy to use and with its compact size offers the best possible wearing comfort.

SMILE combines the efficiency and security of Neat devices with a sleek and modern look.

### Easy operation

The alarm is triggered by a light touch on the red alarm button. The successful reception of the alarm is confirmed by a green LED. If this confirmation of the system is not active, the alarm is automatically sent again.

SMILE must be connected to a receiver (e.g. NOVO homecare phone, TREX 2G portable transceiver, D-TECT or D-SERVER System) to be able to send alarms.

### SMILE at a glance

#### Handy and functional

- Maximum wearing comfort
- Wearable as a bracelet or around the neck
- High battery life
- Practical size
- Waterproof to IP67
- Housing cover replaceable

#### Usability

- Large and clearly identifiable button
- Button responds to any pressure
- Automatic connection to NOVO (Plug & Play)
- Monitored radio transmission

#### Safety

- Reliable radio communication with visual confirmation
- 4-color LED for visual indication of radio triggering and acknowledgment of receipt
- Battery monitoring with alarm to service centre

#### Optimization

- Automatic power saving mode (programmable)
- Transmission and reception capability (bidirectional)
- Optimized transmission power

## SMILE

### SMILE Family

SMILE Family is a range of products meant for the care sector, either at home, in a home care living or in a warden facility. The SMILE Family consist of three portable triggers: SMILE, the standard one, SMILE ID and SMILE FALL.

#### SMILE ID

It is intended to be used in the care sector for monitoring persons who demand extra attention or nurse care by enabling positioning in a D-POS, DPOS-II or D-SERVER system.

It is based on the standard SMILE but with a grey appearance and is also equipped with an RFID circuit which is triggered by the magnetic fields created by a D-POS Antenna or a LOOP Antenna. SMILE ID also has a built-in accelerometer which enables the possibility to monitor unit inactivity.

#### SMILE FALL

In case of a user falls, SMILE FALL will detect it and send a fall alarm.

SMILE FALL is intended for users with a low activity level and a risk of falling. It should be worn on a wristband. SMILE FALL is based on the standard SMILE but with a grey appearance as well.

### Neat, the best choice

The peace of mind of knowing that users have the best care is essential in any socio-health service. If the right technological provider is chosen, the increase in the quality of care is guaranteed.

The application of technology to socio-health transformation is our main commitment with clients and society in general, that is why choosing Neat is the best decision.

More than 30 years of experience and 30% of our budget dedicated to R+D+I have resulted in more than 1.000.000 users assisted with our technology in 40 countries.

Our commitment to quality, security and the environment is demonstrated by our certifications: ISO 9001 (quality), ISO 27001 (security) and ISO 14001 (environment).
